

Day Hospital Clinical Governance Suite

Designed to support safer, simpler, and more compliant care

Running a day hospital means managing credentialing, patient safety, clinical risk, and compliance, often with limited staff and time. Cgov's Clinical Governance Suite is purpose-built for day hospitals, providing the essential tools to stay audit-ready, reduce admin load, and meet NSQHS requirements with confidence.

This suite draws on our long-standing expertise in credentialing and quality systems across Australia and New Zealand (ANZ) healthcare. Designed for ease and practicality, it replaces fragmented workflows with reliable, NSQHS-aligned processes so your team can focus more on care, not compliance.

Whether you're preparing for a short-notice assessment or digitising internal processes, Cgov offers a structured, secure, and cost-effective solution tailored to day hospital operations.

What the Day Hospital Clinical Governance Suite includes:

Credentialing: *Structured and audit-ready*

- **Digital workflows:** Replace manual processes with guided, mobile-enabled credentialing
- **Built-in expiry tracking:** Stay ahead of lapses with automated alerts and reminders
- **Real-time dashboards:** Monitor credentialing progress and outstanding tasks in one view
- **Automated checks:** Regular Ahpra/MCNZ updates and referee follow-ups
- **Express setup:** Fast implementation for upcoming accreditation needs.

Quality Management: *Practical and purpose-built*

- **Incident and risk reporting:** Log, track, and manage clinical events and hazards
- **Feedback workflows:** Capture and respond to patient feedback efficiently
- **NSQHS-aligned reports:** Pre-configured reports to support continuous improvement
- **Alerts and monitoring:** Real-time performance tools to support compliance and risk oversight.

Designed for day hospitals: Scalable and reliable

- **Short-notice assessment ready:** Unannounced audits can be challenging, but with the right tools, maintaining day-to-day readiness becomes more manageable
- **Mobile-friendly forms:** Easy for clinicians, referees and staff members to complete on any device
- **Simplified reporting:** Real-time analytics, reminders, and audit-ready exports
- **Tailored implementation:** Plug-and-play setup with workflows suited to day hospital operations
- **Fixed-scope pricing:** Affordable and transparent, with optional add-ons as you grow.

Why day hospitals choose Cgov

Cgov's Clinical Governance Suite is designed for the specific operating context of day hospitals. It draws on our experience supporting credentialing in ANZ healthcare settings and offers clear, cost-conscious pricing.

Streamlined implementation

The system is designed for ease of setup, requiring minimal configuration. This helps day hospitals to begin using the toolkit quickly, without the need for extensive technical resources.

Clinician-friendly experience

The Suite helps clinicians streamline credentialing and compliance, enabling timely task completion and smoother onboarding via mobile-friendly forms, helping day hospitals maintain strong clinical partnerships.

Transparent and structured pricing

The fixed-scope pricing model provides clarity around costs, helping organisations plan budgets with confidence. Optional add-ons are available for services that may be needed as requirements evolve.

Built-in automation

Cgov's solutions include automated functions such as reminders, expiry alerts, and progress tracking. These help reduce manual follow-up and support consistent compliance management.

Ongoing support

Our team can provide onboarding guidance during implementation and ongoing assistance for troubleshooting or adjustments. This ensures the Day Hospital Suite remains aligned with operational needs over time.
