

Quality Management Solutions (QMS)

Pave the way for easy incident reporting, proactive management and transform your safety culture.

Automate workflows and tasks

Set alerts and reminders

Streamlined team reporting

Role-based dashboard access

Cgov's Quality Management Solutions (QMS) helps healthcare organisations manage risk, ensure compliance, and foster a culture of continuous improvement.

Whether you are moving from a traditional paper-based system or replacing an outdated digital solution that is no longer fit for purpose, implementing a solution like Cgov's QMS can empower you to overcome limitations, and achieve operational excellence.

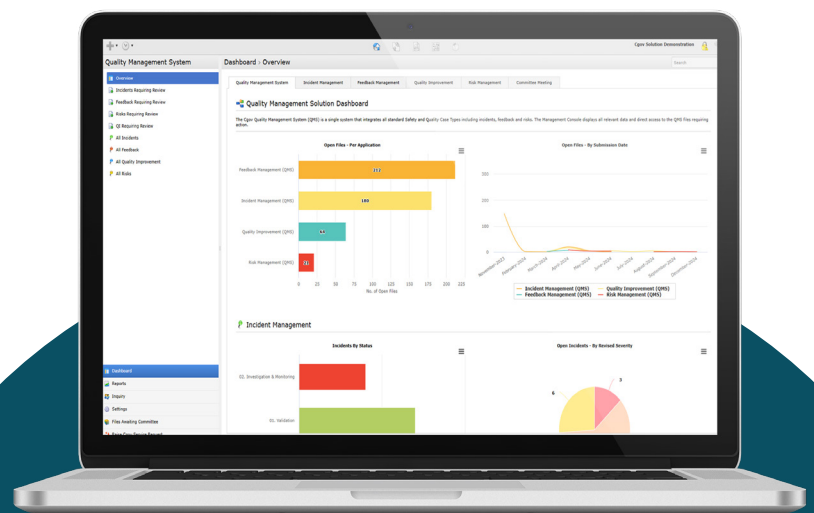

Benefits

Customisable & scalable

Customisable forms with mandatory fields to improve the quality of incident reporting from the outset.

Seamless integration

You can enable connectivity from Cgov solutions to your other online systems.

(07) 3211 4444 | www.cgov.com.au

User friendly

Cloud-based forms that are accessible from desktop and mobile devices which means incident reporting can be completed without requiring a system login.

Shared healthcare innovation hub

Our solutions are supported by our Australian-based support team, start with a single QMS Health app or mix and match apps to suit the demands of your healthcare organisation.

Predictable pricing

Predictable annual license cost makes budget management more predictable.
